ZEPHIR & LINEN

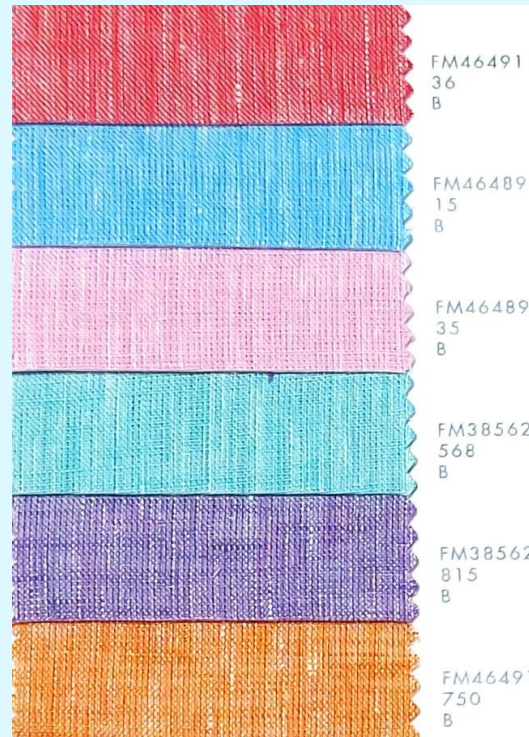

**A day will come when
someone can match the
lightness and preciousness
of our Cotton and Linen.
That day, pigs will fly.**

Sometimes the most natural encounters are those that make things special. Like the one between Cotton and Linen that gives life to an enveloping mix of lightness, elegance and sophistication. For unique and unparalleled fabrics that get the best out of nature.

ZEPHIR & LINEN

***Arriverà un giorno in cui
qualcuno potrà eguagliare
la leggerezza e la preziosità
del nostro Cotone e del nostro
Lino. Quel giorno, i maiali
voleranno.***

*A volte sono gli incontri più naturali a rendere
le cose speciali. Come quello tra il Cotone e il Lino
che dà vita ad un mix avvolgente di leggerezza,
eleganza e raffinatezza. Per tessuti unici
e ineguagliabili, che prendono il meglio dalla
natura.*

LINEN

Maybe you do not know, but the secret of linen is enclosed in a beautiful blue flower of the plant *Linum Usitatissimum* that grows in Europe. What is not a secret, however, are the extraordinary properties that make it unique in the world. Linen, in fact, is:

- **thermo-regulating**: absorbs the heat of the body and expels it outside, leaving a fresh and dry feeling;
- **anallergic**: does not retain dust;
- **extremely strong**: it lasts for a long time and increases in softness with every wash;
- **ecological**: linen requires much less water than other crops and requires a minimum quantity of fertilisers.

LINO

*Forse non lo sapete, ma il segreto del lino è racchiuso in un bellissimo fiore azzurro della pianta del *Linum Usitatissimum* che cresce in Europa. Non sono invece un segreto le straordinarie proprietà che lo rendono unico nel mondo. Il lino, infatti, è*

- **termoregolatore**: assorbe il calore del corpo e lo espelle all'esterno, lasciando una sensazione di fresco e asciutto;
- **anallergico**: non trattiene polvere;
- **altamente resistente**: dura a lungo senza deformarsi e aumenta la propria morbidezza ogni volta che viene lavato;
- **ecologico**: richiede molta meno acqua delle altre coltivazioni e necessita di una minima quantità di fertilizzanti.
